From Bitcoin workshops to a home for freedom tech

Freedom Lab NYC makes powerful tools legible, useful, and social — without sanding away the cypherpunk principles that make them matter.

HANDS-ON EDUCATION • WEST VILLAGE

ILLUSTRATIVE VISION • OUR NEXT HOME

WHERE WE STARTED

Hands on from day one

We began as a Bitcoin-focused education group: helping New Yorkers build hardware wallets, run Bitcoin and Lightning nodes, mine bitcoin, and understand the systems they were using.

WHERE WE ARE

A broader freedom-tech lab

Bitcoin remains the foundation. Around it, our scope now includes sovereign AI, encryption, self-hosted infrastructure, open-source hardware and software, and any practical tool that protects digital rights. Community growth has earned us a dedicated office inside a working West Village maker space — a foothold for workshops, coworking, and shared experimentation.

WHAT MAKES US DIFFERENT

Beginner-accessible. Builder-credible.

We translate cutting-edge, complex systems for laypeople while preserving a serious environment where advanced users and developers can test, use, and build together. Education is not the warm-up; it is the bridge between tools, users, and better tools.

WHERE WE ARE GOING

A street-level Manhattan hub

Our next home is a permanent, unmistakably Freedom Lab building in central Manhattan: well branded, accessible from the ground floor, and globally visible. It will be a classroom, coworking home, and proving ground where the city's best freedom-tech developers meet real users — and where AI helps more members become builders without losing sight of usability, usefulness, or rights.

An open door — with a real core

The audience keeps widening. A meaningful group keeps coming back.

Practitioners with real-world stakes

Privacy infrastructure, software freedom, global Bitcoin reporting, and human-rights adoption.

Seth for Privacy

PRIVACY EDUCATOR • COO, CAKE WALLET • HOST, OPT OUT

A privacy educator and open-source operator who turns Bitcoin, Monero, self-hosting, and data sovereignty into practical guidance people can use.

- ◆ COO of Cake Wallet
- ◆ Hosts the FOSS and privacy-focused Opt Out podcast
- ◆ Runs public Bitcoin, Monero, and privacy infrastructure

Free Software Foundation

DEFENDING COMPUTER USER FREEDOM SINCE 1985

The nonprofit behind a worldwide movement for software freedom: sponsor of GNU, publisher of the GNU GPL, and a leading defender of users' right to run, study, share, and modify software.

- ◆ Sponsors the GNU Project
- ◆ Publishes the GNU GPL, LGPL, and AGPL
- ◆ Defends free-software licenses through its compliance lab

Frank Corva

FORBES CONTRIBUTOR • HOST, NEW RENAISSANCE CAPITAL

A New York-based journalist covering Bitcoin adoption around the world, especially in developing countries; formerly Bitcoin Magazine's White House correspondent.

- ◆ Forbes contributor focused on global Bitcoin adoption
- ◆ Host of new renaissance capital
- ◆ Former White House correspondent for Bitcoin Magazine

Win Ko Ko Aung

GLOBAL BITCOIN ADOPTION FELLOW • HUMAN RIGHTS FOUNDATION

A Burmese activist and refugee who helps nonprofits under authoritarian regimes use Bitcoin for financial freedom. His 2025 aid campaign funded tens of thousands of meals and rice for 350 households in Burma.

- ◆ Global Bitcoin Adoption Fellow at HRF
- ◆ Former Bitcoin Policy Institute Human Rights Fellow
- ◆ Raised 5M+ sats for direct earthquake relief in Burma

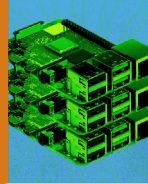

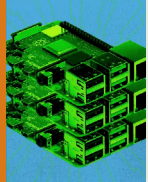

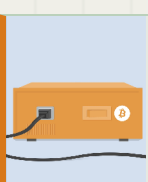

A curriculum you can see

The archive begins with Bitcoin fundamentals and grows into a broader freedom-tech program.
